FINDFILL / CUSTOM SOFTWARE

Your way of staffing. Built into software you own.

For healthcare facilities, facility groups and staffing agencies.

Start with a free conversation.

About 30 minutes. Completely free. No obligation. We discuss your goals and whether the FindFill platform, custom software or an existing tool is the right fit. Paid discovery begins only after you approve the scope.

FOR FACILITIES

Build your internal staffing operation.

A branded staff bank, recruiting and onboarding workflows, credential tracking, shift coordination and reporting across locations. Your team runs the program; we build the agreed software.

FOR STAFFING AGENCIES

Win accounts. Fill more existing orders.

Candidate reengagement, order prioritization, client portals, recruiter workflows and operational dashboards built around what makes your agency work.

A clear scope. A clear investment.

Discovery & blueprint — **$7,500**

Defined scope: one business unit, up to six interviews and three systems. Ranked opportunities, project economics, build-versus-buy recommendation and blueprint. Typically 2-3 weeks. Larger scopes quoted in advance.

Custom build — **From $35,000**

A focused first release, with a fixed-price proposal after discovery. Agreed workflows and integrations, testing, training, code, documentation and 30-day stabilization. Payments: 40% / 40% / 20% at agreed milestones.

Optional management — **From $2,000/month**

Starting Care: up to 8 service hours monthly. Month-to-month, 30 days notice, business-hours coverage. Broader coverage and ongoing improvement quoted separately. Self-management has no FindFill management fee.

Operating costs are separate: the client pays hosting, texting/SMS, AI token usage and vendor subscriptions, even under a managed plan. Discovery and build fees are separate; prices are USD.

Ownership: the agreement defines client-owned custom code and licensed components. FindFill platform ownership and third-party software are excluded. Any selected platform subscription remains separate. Your team operates staffing; clinician supply, outsourced recruiting and payroll services are not included by default.
